Installing Gyprock™ Cornice

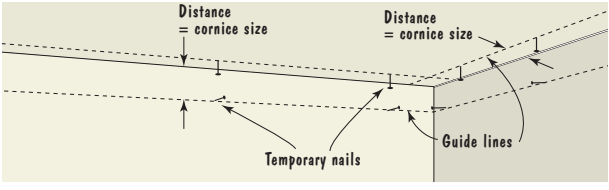
Shopping List

- Gyprock™ Cornice
- Gyprock™ Cornice Cement
- Gyprock Mitremasta™ or mitre box
- Plasterboard saw
- Cornice small tool and 38mm broadknife
- Hammer and nails

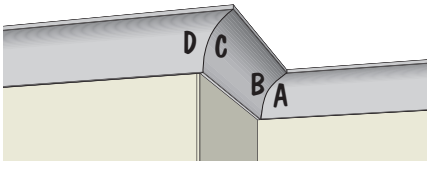
Gyprock™ Cornices are designed to provide an attractive finish at the junction of the wall and ceiling. Gyprock™ Cornice Cement is formulated for adhesion of cornice to plasterboard surfaces. If the room is already decorated, you will need to treat the adhesion zone by removing any wallpaper, and sand painted surfaces or coat with a PVA adhesive such as Bondcrete.

Measuring and Cutting Cornice

1. For accurate alignment of the cornice, mark a line on both ceiling and wall at a distance from wall/ceiling junction equal to the size of the cornice e.g. 55mm for a 55mm cove cornice.



2. Install temporary nails to the wall and ceiling close to corners and at 1.8m centres along the lines. These will support the cornice until the adhesive sets.



3. Measure from corner to corner of the room on the wall and mark the cornice section to be cut. Use a single length for each wall if possible.

4. Corner joins are to be mitred. Cut each cornice to length with a hand saw using a Gyprock Mitremasta™ for cove cornice or a mitre box. If using a mitre box, make sure the cornice is standing upright in the box in the same orientation as it will be on the wall.

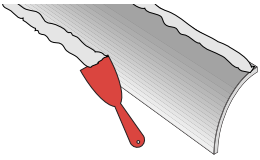
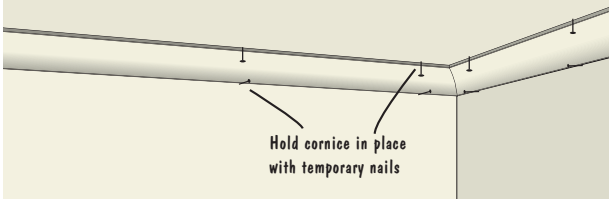
Installing Gyprock™ Cornice

Fixing Cornice

1. Mix Gyprock™ Cornice Cement with water as per the instructions on the pack.
2. Apply generous beads of Cornice Cement continuously to the back of the cornice along the top and bottom edges and to mitres.
3. Each section should be buttered and fixed separately, starting with shorter lengths.

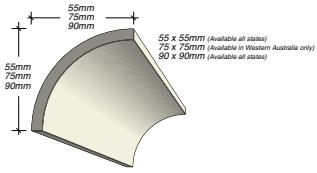


4. Remove surplus cement with a cornice tool and clean down with a brush or sponge.
5. Smooth off mitres and fill any gaps with Cornice Cement.
6. Allow to set for at least two hours before removing nails and sanding joints.

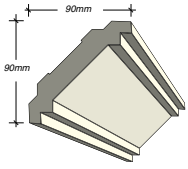


Available Gyprock™ Cornice Types

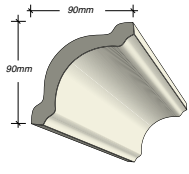
Cove Cornice



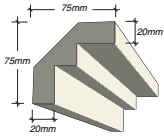
Tempo™ Cornice



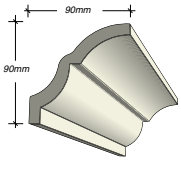
Classic™ Cornice



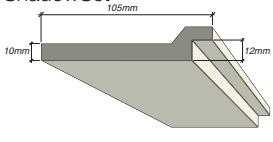
Jazz™ Cornice



Concerto™ Cornice



ShadowSet™



Symphony™ Cornice
